One

# Content

Bug Fixing		
Component	Title	Description
Packing	Error if the user clicks the next button quickly.	The WMS will be able to manage several clicks in Next button under Packing menu without any errors.
Picking	Error if the user clicks the next button quickly.	The WMS will be able to manage several clicks in Next button under Picking menu without any errors.
Picking	Search carts takes too long to bring the list.	It was improved the time to search carts in Picking menu.
Packing	Delete box content not working correctly.	The user will be able to delete any content of the boxes and complete the packing successfully.
Picking	Picking not working with PTS and duplicated items.	The user will be able to see in Picking screen the correct amount of items.
New features		
Sync	WMS is not synchronizing items with special characters.	WMS will be able to synchronize items with special characters.
Menu	Add WMS user name on delivery note and transfers.	WMS will allow to show user name on Inventory transfer (put away, transfer), Inventory adjustment and deliveries.
Inventory Transfer	Comment field in inventory transfer.	The user will be able to enter comments in ITR. This info will goto the comments fields in SAP document.
Inventory	Inventory Inquiry by Serial number	WMS will have the functionality in inventory inquiry by serial number, show product and location.
Cycle Count	WMS should be requesting the Mfr Serial Number for serialized items.	WMS should be configured in two ways: <ol style="list-style-type: none"> <li>1. Have the WMS to request both Mfr Serial # and Serial #.</li> <li>2. Have the WMS to request only one Serial # and synch this information to both fields in SAP: the Mfr Serial # and the Serial #.</li> </ol>
Label Printer	Possibility to use the same fields of BarCode Report in another Report.	WMS will have the possibility to create two different Reports (Different layout) using the same database fields.
Reception Label	Add the Batch # and Expiration Date.	The WMS will be able to print the Batch and Expiration Date on any Reception Label.
Packing Label	Add the BP Code and BP Name so it can be printed.	WMS will have the possibility to print the BP Code and BP Name on the DIRAPA_Etiqueta-Caja-o-Pallet.btw report.
